HARSH SAINI

PRODUCT DESIGNER | AI PRODUCT DESIGN | DESIGN ENGINEERING

Bengaluru, India | +91 84338 02275 | hsainimercator@gmail.com

Portfolio: harshsaini-portfolio-seven.vercel.app LinkedIn: harsh-saini-49212818b

PROFILE

Product Designer specializing in **AI-powered products, UX/UI design, and design engineering**. Experienced in generative AI workflows, AI agent interfaces, brand-context systems, and enterprise SaaS. Translate product requirements into intuitive interactions, functional prototypes, and production frontend experiences using React and TypeScript.

EXPERIENCE

Product Designer | ShopOS.ai

Oct 2025 – Present

- **AI Product Design:** Owned the end-to-end UX of Adaptive Intelligence, designing category-aware creative workflows that let sales teams generate tailored AI video ads live on client calls in under 10 minutes, replacing a manual preparation process that previously took half a day or more.
- **Brand Memory & AI Agents:** Designed and shipped Brand Memory, defining what brand context is captured and how users interact with and reuse it across AI workflows. Built the frontend with engineering, which developed the underlying memory system.
- **AI-Assisted Editing:** Designed the Refine & Edit experience, allowing users to annotate inaccurate AI-generated images and request targeted changes through AI-powered or human-assisted editing rather than regenerating the entire image.
- **Product Discovery & UX Iteration:** Explored when brand information should be collected during onboarding, what content to extract, and which processes should run in the background; iterated on workflows using internal testing and cross-functional feedback.
- **Design Engineering:** Built production React, TypeScript, and CSS interfaces for ShopOS and Sloosh, including Brand Memory, Refine & Edit, chat UI, micro-interactions, animations, and landing pages; contributed through reviewed pull requests and working prototypes.

UI/UX Designer | SketchMonk

Oct 2024 – Sep 2025

- Designed enterprise SaaS and cloud-native cybersecurity interfaces, including container browsing and ticketing workflows.
- Created reusable interaction patterns and design-system components; collaborated with engineering to prototype and deliver implementation-ready flows.

Freelance Designer | Digitow Design Studio

Jul 2024 – Sep 2024

- Designed responsive web and mobile interfaces for client projects, translating early concepts into reusable UI systems and brand-aligned experiences.

SKILLS & TOOLS

Product Design: UX/UI Design, Interaction Design, User Flows, Information Architecture, Design Systems, Prototyping

AI Product Design: Generative AI, AI Agents, Agent Workflows, Human-AI Interaction, Brand Context Systems

Design Engineering: React, TypeScript, CSS, Frontend Implementation, Interactive Prototyping, Creative Coding

Tools: Figma, Cursor, Claude Code

SELECTED EXPERIMENTS

Browser-based experiments with WebGL, shaders, ASCII rendering, agent interfaces, and generative interactions. Working examples available in portfolio.

EDUCATION

B.Com (Hons) — University of Delhi, School of Open Learning | 2019–2022

BridgeCohort — Ownpath | UI/UX Mobile & Web Design — Udemy
