Summary

Product Designer and Design Engineer focused on AI, product experiences, and brand systems. I move between product thinking, interaction design, prototyping, and frontend implementation to turn complex ideas into products that are clear, useful, and ready to ship.

Experience

Product Designer | ShopOS.ai

Oct 2025 – Present

- Designed and shipped AI product experiences across creative generation, agent workflows, Brand Memory, and commerce operations.
- Designed Adaptive Intelligence across 4 creative workflows, taking product inputs to pitch-ready creative in ~10 minutes.
- Led Brand Memory from product definition to frontend implementation, shaping how brand context is captured and reused across workflows and AI agents.
- Used product experiments and behavioural data to rethink when Brand Memory should enter the user journey, improving how users discover and interact with the system.
- Built interactive prototypes and frontend experiences to turn product concepts into working software, alongside landing pages, launches, and brand experiences that made complex AI capabilities easier to understand.

UI/UX Designer | SketchMonk

Oct 2024 – Sep 2025

- Worked across different products and industries, turning ideas into clear digital experiences.
- Designed cloud native cybersecurity workflows across container browsing, ticketing, and enterprise product experiences.
- Collaborated with developers and stakeholders to take designs from idea to execution.
- Created reusable interaction patterns and design system components, then worked with engineering to prototype and ship development ready flows.

Freelancer | Digitow Design Studio

Jul 2024 – Sept 2024

- Designed responsive web and mobile experiences for client projects, turning early product ideas into reusable UI systems and brand aligned interfaces.

Skills & Tools

Product: UX Design, Interaction Design, Information Architecture, Design Systems, Prototyping, User Research

AI Product Design: Agent Workflows, Generative AI, Context and Memory Systems, Human AI Interaction

Design Engineering: React Prototyping, Design to Code, Creative Coding, Web Experiences

Brand and Growth: Landing Pages, Product Marketing Design, Brand Systems, Campaign

Experiences Tools: Figma, Claude Code, Cursor

Experiments

I build browser based experiments with WebGL, shaders, ASCII rendering, agent interfaces, and generative interactions to explore the space between design and engineering.

Education

- B.Com (H) | Delhi University - SOL | 2019 - 2022
- Bridge Cohort | Ownpath
- UI/UX - Mobile and Web Design Course | Udemy
